05 / CIRCULAR WALK · LA CORVA

La Corva – Arroyo de la Breña – Montejo track – Los Casarones – Portillo de la Serna – Los Hoyones – Prado Serna – Las Peñas de los Tasugos – Corral de Riopanero – Los Perijoncillos – La Corva

A circular walk along tracks and paths in the Monte Hijedo area, following the sequence of places recorded in the 2019 documentation.

9.74 km	Circular route	Documented: 2019

Before setting out. The route was last documented in 2019. Check vegetation clearance and track maintenance. Navigation may be difficult at the end of the track that enters the forest from the Montejo track. Download mapping and verify junctions before leaving.

Route description

The walk starts at the La Corva shelter. The documentation describes two initial alternatives meeting where the dead-end track into Monte Hijedo joins the Montejo de Bricia track, towards the Riconchos road. From the Montejo track, one option turns right towards Arroyo de la Breña and returns to La Corva. The other turns left towards Riconchos and the source of Arroyo de Hijedo, then returns to La Corva along the track; this option shares a section with the PR-BU-30 trail.

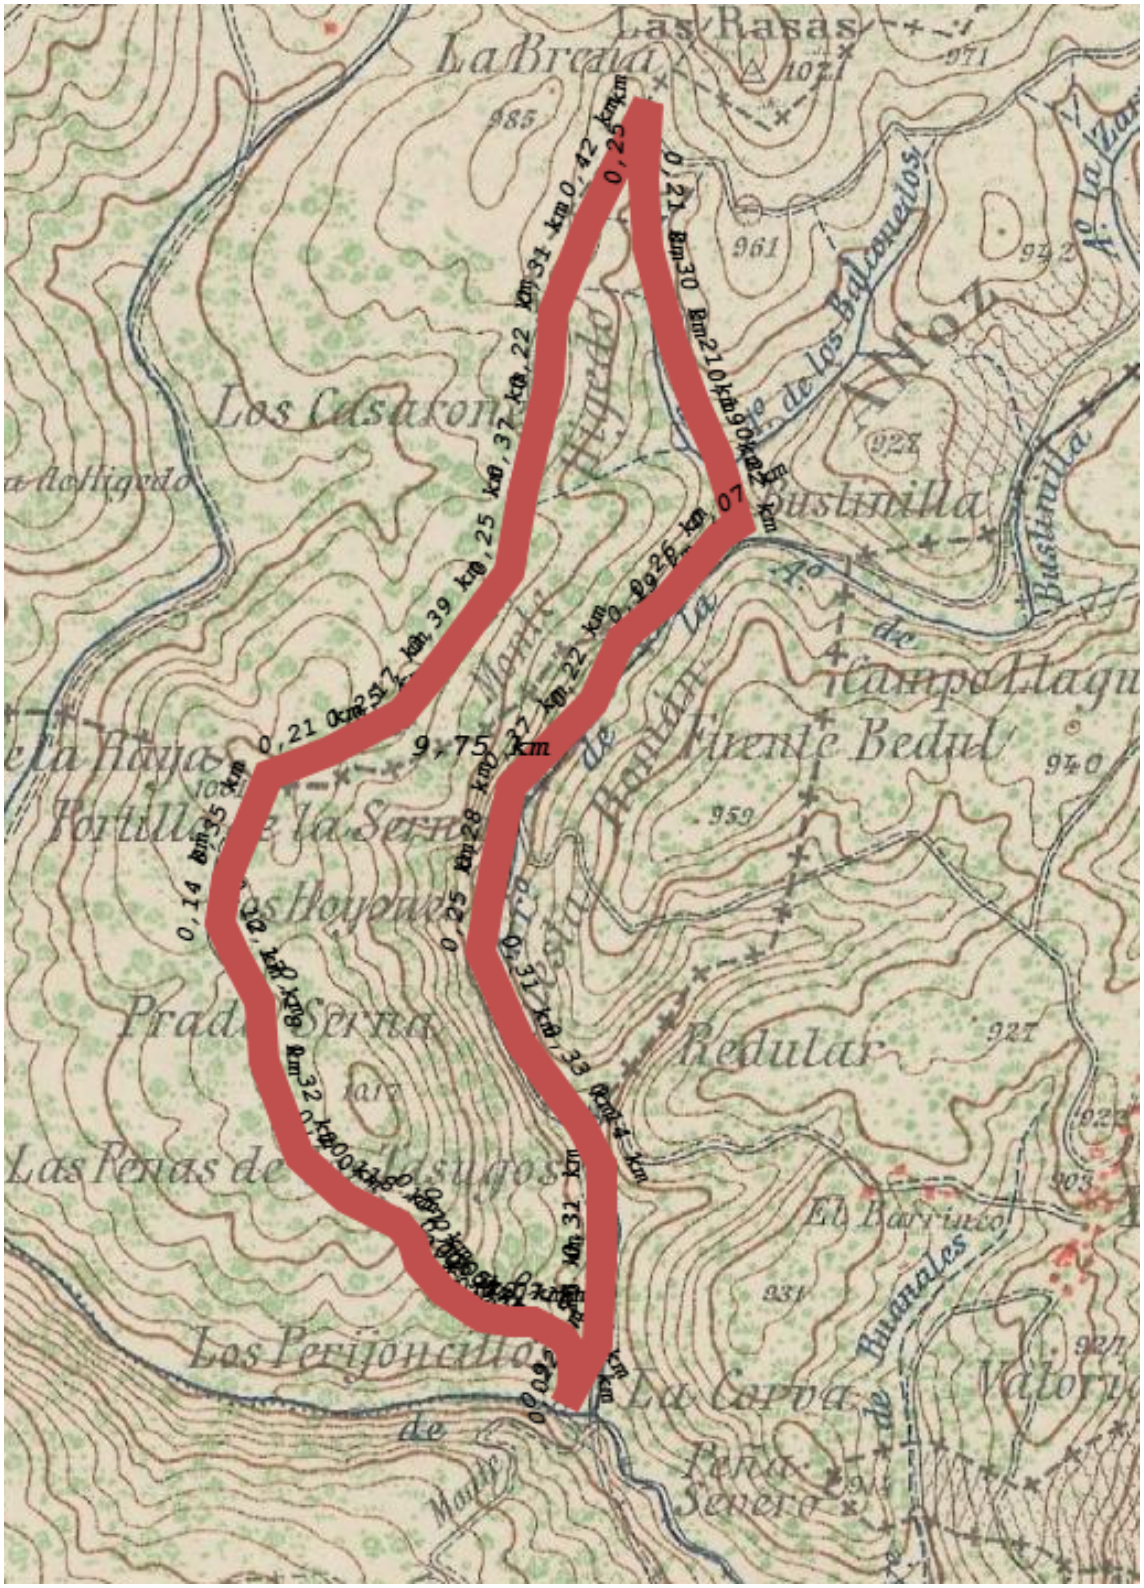

Option A. Climb behind the shelter on the old Riopanero–Higón–Santa Gadea path.	Option B. Take the track to the right of La Corva on the old Riopanero–Montejo de Bricia route.

Stops in documented order

01	La Corva	02	Arroyo de la Breña
03	Montejo track	04	Los Casarones
05	Portillo de la Serna	06	Los Hoyones
07	Prado Serna	08	Las Peñas de los Tasugos
09	Corral de Riopanero	10	Los Perijoncillos
11	La Corva		

2019 reference plan

La Corva – Arroyo de la Breña – Montejo track – Los Casarones – Portillo de la Serna – Los Hoyones – Prado Serna – Las Peñas de los Tasugos – Corral de Riopanero – Los Perijoncillos – La Corva

The red line and distances on the plan come from the original documentation. The route sheet records 9,740 m; the plan marks approximately 9.75 km. It is a visual reference, not a GPS track or a check of current conditions. Place names are retained as documented; verify locations on the ground.
